

# How Operation Identification Can Help You

The purpose of the property identification program is to discourage theft of your property. This identification process will also help the UCCM Anishnaabe Police identify lost or stolen property. Electronic equipment such as televisions, stereo equipment, VCR's, DVD players, CD players, tools, small appliances, and other items of value to you should be tracked and recorded so that you may help police recover your property in the event of theft. Pre-numbered tags have been enclosed with this form to help you get started. Use other identification techniques such as engraving with a unique number as well. Mark items as conspicuously as possible without defacing them. Make sure the tags or other markings are permanently affixed.

If you need more space, write your details on another piece of paper and staple it to this form. If possible, keep receipts and proof of purchase.

Keep a copy of this form in a secure place, to be ready when needed. Once you've marked your property, display your Operation Identification sticker where it will be sure to be seen!
